Summary

Computer Science Engineering undergraduate specializing in AI & ML with hands-on experience predictive ML models, and multimodal LLM architectures. Proficient in ML Algorithms TensorFlow, and high-dimensional data processing. Experienced in evaluating model outputs through data annotation and deploying production-ready ML assets.

Skills

AI & Machine Learning: Supervised/Unsupervised Learning, Loss Functions, ANN, CNN

Frameworks & Libraries: TensorFlow, Scikit-Learn, NumPy, Pandas, FastAPI, Streamlit

Languages & Big Data Tools: Python, C++, SQL, PowerBI, Excel

Engineering & Evaluation: Data Annotation, Feature Engineering, Data Cleaning, Git, GitHub

Experience / Leadership

Data Annotation(USA)

Jun 2026 - Jul 2026

AI Trainee (Remote) & LLM Evaluation

- Evaluated 500+ multimodal LLM outputs for hallucinations and reasoning flaws, translating data annotations into bias mitigation and offline model verification with a 20% error reduction.

CodeCrafters Club

Aug 2025 - Jul 2026

Co-Head

- Organized 10+ technical workshops and AI competitions for 300+ students, mentoring junior members in Machine Learning, Computer Vision, and competitive programming pipelines.

Projects

Road Argus: Real-Time Video Analysis | *PyTorch, OpenCV, YOLOv8, Python* | [View Project](#)

- Engineered real-time ADAS video processing using YOLOv8 (83% mAP) on 11,800+ images for anomaly detection.
- Optimized low-latency OpenCV frame pipelines and built Node.js microservices for driver alert triggers.

HireVision: Multimodal AI & LLM Platform | *Python, PyTorch, LLMs, FastAPI, OpenCV* | [View Project](#)

- Built an AI interview platform using LLMs for dynamic query generation and PDF parsing via Gemini API.
- Integrated webcam video analytics for live proctoring and ElevenLabs TTS for voice interaction.

Healthcare Predictive Analytics Dashboard | *Python, Scikit-Learn, SQL, Streamlit* | [View Project](#)

- Mined 30+ years of high-dimensional global health datasets to extract predictive statistical insights.
- Developed a Streamlit UI with an embedded LLM agent for natural language dataset queries.

Awards & Certifications

- **Top 3 Finalist (3rd Place), GDG Hackathon** – Ranked among 800+ teams for building a CV-based video anomaly detection model.
- **Second Runner-Up, Engineer's Day Competition** – Developed a Fake News Detection Classifier using TF-IDF and Logistic Regression.
- **Industrial Certification:** Python with Data Science & Machine Learning.

Education

DAV Institute of Engineering and Technology

Expected Graduation: 2027

B.Tech in Computer Science and Engineering (Specialization in AI & ML)

2023 – 2027
