

GURNEET SINGH

+91-7986641911 | gurneetsingh944@gmail.com | GitHub | LinkedIn

PROFILE

B.Tech CSE student specializing in AI/ML, with hands-on experience in predictive modeling, full-stack AI application development, and data analysis using Python, TensorFlow, and Scikit-Learn. Built real-world ML systems for road anomaly detection, healthcare analytics, and AI-powered interview platforms.

EDUCATION

DAV Institute of Engineering and Technology | 2023-2027
Bachelor of Technology in Computer Science and Engineering
(Specialization in AI & ML)

- Relevant coursework [OOPS, AI, DBMS, CN, ML, etc]

SKILLS

Programming: C++, Python, Java

Machine Learning: Pandas, NumPy, Data visualization, Scikit-Learn, TensorFlow, Data processing, Streamlit, FastAPI

Databases: MySQL, SQLite

Tools: Git, GitHub, VS Code, Kaggle, Google Colab, DSA using C++

Soft Skills: Project Management, Team Leadership, Public Speaking, Focused

PROJECTS

Vaahan-Saarthi

- Built a real-time pothole detection ADAS module using YOLOv8 (83% accuracy) trained on 11,800 images with data augmentation for varied lighting and road conditions.
- Integrated OpenCV for frame processing with a Node.js backend to deliver real-time alerts to the driver.

HireVision – AI Mock Interview Platform

- Built an AI-powered mock interview platform that conducts real-time voice-based interviews using Grok API, with dynamic question generation based on candidate's uploaded resume (PDF parsing via Gemini API).
- Implemented live proctoring with webcam monitoring, face-absence warnings, and voice interaction via ElevenLabs TTS; deployed on Vercel (Next.js) + Render (FastAPI) with MongoDB for auth and session management.

Health Care Disease Analysis

- Built a Streamlit-based healthcare dashboard to analyse disease data from 1990-2021 using interactive charts, with an integrated chatbot that answers user-specific queries from the dataset.
- Python/Pandas/Streamlit/Seaborn/Matplotlib/Gemini API.

EXPERIENCE / LEADERSHIP ROLES

Co-Head | The CodeCrafters Club

- Led coding culture initiatives by organizing technical workshops, multi-round coding events, and encouraging students to participate in programming competitions.

CERTIFICATIONS

- Python with Data Science (Industrial Training)
- Programming in Java
- Machine Learning and Artificial Intelligence

ACHIEVEMENTS

SECOND RUNNER-UP | ENGINEER'S DAY CODING COMPETITION

- Built a Fake News Detection System using Logistic Regression and TF-IDF (Scikit-Learn) to classify misinformation; led the team as team lead.

TOP 3 FINALIST (3RD PLACE) | GDG 30-HOUR HACKATHON

- Ranked Top 3 among 800+ teams at CT Institute of Technology, Jalandhar; developed a Computer Vision model for Road Anomaly Detection in autonomous driving.
